

INDUSTRY WARNING!

Imported NON-COMPLIANT STEEL MESH is being sold to unsuspecting customers

The unique markings on the longitudinal and crossbars of the mesh do not match the markings on the quality certificate sent to the customer.

Two options to protect yourself:

1. **Verify the markings on the mesh MATCH the markings on the certificate.**

If they don't match, return the mesh to the supplier as non-conforming product.

[View certificate](#)

2. **Buy steel mesh from a SRIA member.**

ALL SRIA members hold current JASANZ accredited 3rd party certification to prove their mesh conforms to AS/NZS 4671.

Don't take the risk of having to replace the building or structure because you used non-conforming steel mesh.
